PROFESSIONAL SUMMARY

Fullstack Engineer who maximizes system scalability and infrastructure reliability across the entire software lifecycle by engineering systems based on industry standards and leveraging foundational principles to debug manually, while effectively utilizing prompt engineering and model-efficient AI usage as an accelerator to drastically reduce delivery turnaround times.

WORK EXPERIENCE

Fullstack Engineer | Ascension Digital Solutions

Aug 2024 – Present

(Client: Security Bank Corporation)

Architecting, deploying, and maintaining foundational digital banking solutions for Security Bank Corporation. Collaborating closely across both responsive frontend interfaces and high-performance backend production architectures to ensure seamless high-availability banking services and optimized consumer user experiences.

Intermediate PHP Developer | Dynamic Strategy

Nov 2022 – May 2024

Solutions (Client: Longsage)

Analyzed and implemented complex technical requirements and critical architectural updates for high-throughput backend services deployed in the highly regulated PAGCOR POGO industry environment. Successfully engineered, scalable file management mechanisms and robust multi-factor/OTP authentication systems.

PHP Developer | YEMPO Solutions

Oct 2022 – Nov 2022

Maintained and refactored an enterprise legacy financial invoicing system, systematically optimizing transaction processing pipelines while ensuring complete code integrity and comprehensive runtime error resolution.

Information System Analyst II | DOST-PCIEERD

Jan 2022 – Sep 2022

Served as Principal Full Stack Developer evaluating legacy agency operations. Partnered closely with internal client divisions to structure, automate, and build reliable digital web applications from the ground up, entirely digitizing high-priority institutional procedures.

Project Technical Specialist I | DBP Service

Oct 2021 – Dec 2021

Corporation (Client: DOST-PCIEERD)

Mapped standard operational workflows and authored technical software requirements documentation to translate manual legacy organizational processes into scalable, modern web application designs.

PHP Developer | Optimo International

Nov 2020 – Oct 2021

Engineered, optimized, and iterated data-driven internal sales application software leveraging the CodeIgniter PHP framework and Bootstrap framework to accelerate core operational performance metrics.

Frontend Developer | Trivers

Jul 2020 – Aug 2020

Translated high-fidelity, pixel-perfect PSD layouts into performant, responsive frontend web components using Vue.js and the Vuetify material design framework.

Healthcare Representative | TaskUs

Jun 2019 – Dec 2019

Provided advanced technical account triage, client issue resolution, and critical client relationship care for comprehensive healthcare-related consumer and corporate partner inquiries.

Outsourced Developer | Philippine National Police

(Logistics Office, Camp Bagong Diwa)

Warehouse Automated Inventory System (WAIS): Designed and built a secure, centralized logistics inventory application using PHP, Bootstrap, and JavaScript to manage high-security camp logistics data, tracking critical hardware, fleets, and tactical gear.

Oct 2018 – Dec 2018

Software Developer & Support | DOST-PCIEERD

Events Registration System: Designed and implemented an institutional event coordination engine using Laravel 5 and Bootstrap, alongside performing physical server provisioning, local network architecture setup, and hardware troubleshooting.

Jun 2017 – Aug 2017

EDUCATION

Bachelor of Science in Computer Science | Taguig City University

Graduated with a comprehensive foundation in advanced algorithms, systems architecture, relational database management systems, and software engineering methodologies.

2014 – 2020

Bachelor of Science in Software Development | AMA Computer Learning Center Guadalupe

Acquired foundational competencies in computer logic formulation, structural programming paradigms, and core software development principles, initiating a long-term technical engineering track.

2014 1st Semester

Secondary Education | President Diosdado Macapagal High School

2010 - 2014

Primary Education | EMS Signal Village Elementary School

2004 - 2010

TECHNICAL INFRASTRUCTURE & SKILLS

Core Languages & Frameworks	PHP (Laravel, CodeIgniter, Yii2), TypeScript, JavaScript (Node.js, Express.js), Python (FastAPI), Java (SpringBoot)
Frontend	React, Vue.js, Bootstrap, jQuery, HTML5, CSS3, Tailwind
Databases & Caching	MySQL, PostgreSQL, SQL Server, MongoDB, Redis, Valkey
Agentic AI & Automation	Claude, Gemini, GPT API, LM Studio, ElevenLabs, Twilio, ProcessMaker, Zapier, Make, Monday.com
Infrastructure & Deployment	Docker, Apache, Nginx, Render, Supabase
QA, Testing & Operations	Test Driven Development (TDD), Selenium Test Automation, Remix Smart Contract Deployment, Network & Hardware Provisioning
Methodologies & SDLC	Agile Scrum, Waterfall, Full SDLC Lifecycle

PROFESSIONAL & PERSONAL INTERESTS

System Architecture Development • Music Composition & Writing • Motorcycle Riding • Guitar Engineering & Upgrades
